
Dejan Pavlovic

Senior Full-Stack Engineer

Lajkovac, Serbia

dejan.pavlovic327@gmail.com

SUMMARY

Senior Full Stack Node.js Engineer with over 10 years of commercial experience building scalable, secure, and high performance web applications and SaaS platforms. Strong backend focus with Node.js, NestJS, and cloud native AWS architectures, combined with solid frontend experience using React and Next.js. Proven track record of designing systems from scratch, optimizing performance, reducing infrastructure costs, and delivering production ready solutions used by thousands of users. Comfortable working in distributed teams and owning features end to end from requirements to deployment and monitoring.

SKILLS

Node.js, NestJS, Express, Fastify, REST APIs, GraphQL, WebSockets, Background Workers, Queue Systems, React, Next.js, TypeScript, JavaScript ES6+, HTML5, CSS3, Tailwind CSS, PostgreSQL, MySQL, MongoDB, Redis, DynamoDB, Supabase, AWS Lambda, API Gateway, EC2, S3, RDS, CloudeWatch, Docker, Kubernetes, Terraform, GitHub Actions, CI/CD, Microservices, Event Driven Architecture, System Design, Secure API Design, OWASP, Agile Scrum

EXPERIENCE

TechBiz - Senior Full Stack Engineer

February 2023 – May 2026

- Architected and developed multi tenant SaaS platforms using Node.js, NestJS, and PostgreSQL, supporting thousands of active users across multiple clients.
- Designed scalable backend architectures with clear service boundaries, improving long term maintainability and onboarding speed for new engineers.
- Built production grade REST and GraphQL APIs consumed by React and Next.js frontends, ensuring high performance and consistency.
- Implemented authentication and authorization using JWT and OAuth2, including role based access control for enterprise customers.
- Designed and deployed serverless solutions on AWS using Lambda and API Gateway, reducing operational costs and simplifying scaling.
- Introduced Docker based local development and Terraform infrastructure as code, standardizing environments across teams.
- Established CI/CD pipelines with automated testing and deployments, significantly reducing release risks and manual work.

-
- Worked closely with product managers and designers to translate business requirements into technical solutions and deliver features on schedule.
 - Actively participated in code reviews, architectural discussions, and mentoring of mid level developers.

1648 Factory - *Senior Full Stack and DevOps Engineer*

January 2022 – January 2023

- Designed and delivered SaaS platforms for lead management, call tracking, and messaging systems handling thousands of daily users.
- Developed backend services and APIs using Node.js and GraphQL to integrate CRM systems such as Salesforce and HubSpot.
- Led cloud infrastructure design and setup on AWS and GCP with Docker and Kubernetes, achieving high availability and stable deployments.
- Implemented CI CD pipelines using GitHub Actions and Terraform, reducing deployment time and minimizing downtime.
- Introduced centralized logging, monitoring, and alerting, improving incident response time and system observability.
- Collaborated with cross functional and distributed teams across multiple regions, aligning technical solutions with business goals.
- Contributed to architectural guidelines, documentation, and best practices to improve consistency across projects.

1648 Factory - *Senior Frontend Developer & Tech Lead*

January 2020 – December 2021

- Designed and built production-grade web interfaces using React, Next.js, TypeScript, and modern CSS (Tailwind, CSS Modules, styled-components).
- Owned end-to-end frontend development from requirements and design handoff (Figma) to implementation, optimization, and production deployment.
- Built complex, data-driven UI components including real-time views, admin panels, configuration screens, and analytics-style views.
- Implemented server-side rendering (SSR), static generation (SSG), and incremental rendering to improve performance, SEO, and time-to-interactive.
- Integrated frontend applications with REST and GraphQL APIs, handling authentication, authorization, error handling, and edge cases.
- Collaborated closely with product managers, designers, and backend engineers to translate business requirements into intuitive user experiences.

DBB Software - *Senior Full Stack Developer*

May 2018 – December 2019

- Designed, developed, and maintained scalable full-stack web applications using React, Next.js, Node.js, NestJS, and TypeScript.
- Owned features end-to-end: UI implementation, backend APIs, database modeling, and production deployment.

- Built high-performance frontend interfaces with SSR/SSG, optimized rendering, and reusable component systems.
- Developed robust backend services including REST and GraphQL APIs, authentication systems, and background workers.
- Designed and optimized relational and NoSQL databases (PostgreSQL, MongoDB), ensuring data integrity and performance.
- Integrated third-party services (payments, external APIs, analytics, Alpowered features).
- Implemented clean architecture and scalable patterns, supporting long-term product growth. Wrote unit, integration, and e2e tests to maintain high reliability across frontend and backend.
- Deployed and maintained applications using Docker, CI/CD pipelines, and cloud infrastructure (AWS).

DBB Software - *Backend Developer & DevOps*

March 2016 – April 2018

- Developed backend services and microservices using Node.js and NestJS for fintech, healthcare, and enterprise clients.
- Built secure REST and GraphQL APIs with JWT based authentication and authorization. Optimized PostgreSQL and Redis usage by improving queries, indexing, and caching strategies, significantly improving performance under load.
- Implemented background processing using queues and scheduled jobs for reporting, notifications, and data synchronization.
- Integrated third party services including payment gateways, CRM systems, and messaging platforms.
- Conducted code reviews, performance profiling, and basic security audits following OWASP recommendations.
- Supported junior developers through mentoring and technical guidance.

EDUCATION

University of Belgrade - *Master of Computer Science*

2016

EDUCATION

Coursera – **Server-Side Development with Node.js**

Meta Full-Stack Developer Professional Certificate

MIT – **Full Stack Development with MERN (executive/online programs)**

W3C – **Front-End Web Developer**

Docker – **Docker Certified Associate**
