

Marek Baranji

Nova Gorica, Slovenia | marekbaranji@gmail.com

Summary

Senior Full Stack Engineer with **13+ years of professional experience per company** designing, developing, and scaling enterprise-grade web platforms. Deep expertise in **Node.js, React, Java (Spring Boot), Python (FastAPI), PHP, Angular, and Vue**, with a proven record of building highly scalable, secure, and maintainable systems. Skilled in **microservices, event-driven architecture, CI/CD pipelines, DevOps practices, and cloud-native deployments**. Experienced in mentoring teams, leading architecture decisions, and modernizing legacy systems while delivering measurable business outcomes.

Education

MASTER'S DEGREE OF COMPUTER SCIENCE | JUNE 2013 | UNIVERSITY OF NOVA GORICA

- Major: Software Engineering and Information Systems
- Minor: Technology Management
- Related coursework: Data Structures and Algorithms

Skills & Abilities

JavaScript, TypeScript, PHP, Java, Python, SQL, React, Next.js, Angular, Vue, Redux, Zustand, RxJS, Tailwind CSS, MUI, HTML5, accessibility, Core Web Vitals, Node.js, NestJS, Express, Laravel, Symfony, WordPress, Java Spring Boot, FastAPI, Django, GraphQL, REST, WebSocket, PostgreSQL, MongoDB, MySQL, Redis, RabbitMQ, Kafka, Docker, Kubernetes, GitHub Actions, Jenkins, GitLab CI, AWS, ECS, Lambda, EC2, S3, CloudFront, DynamoDB, GCP, Azure App Services, Vercel, Terraform, Nginx, Prometheus, Grafana, ELK, Jest, React Testing Library, Cypress, Playwright, Mocha, Supertest, Pact, PHPUnit, TDD, E2E, Microservices, event-driven systems, DDD

Experience

Senior Software Engineer | Netguru | 11/2024 – 02/2026

- Designed and developed scalable **full-stack applications** using **Node.js, Express.js, React, and TypeScript** for high-traffic web platforms.
- Built and maintained **RESTful and GraphQL APIs** using **Node.js**, improving backend response times by **30%** through query optimization and caching.
- Developed responsive frontend interfaces using **React, Next.js, Redux, HTML5, and CSS3**.
- Implemented **authentication and authorization** using **JWT, OAuth2, and role-based access control (RBAC)**.
- Designed and optimized **database schemas** using **MongoDB, PostgreSQL, and MySQL** to improve data performance and scalability.
- Built **real-time features** such as notifications and live updates using **WebSockets and Socket.io**.
- Maintained and enhanced **legacy backend services written in PHP (Laravel)** while gradually migrating critical modules to **Node.js microservices**.
- Integrated **third-party APIs and payment systems** using both **Node.js and PHP** services.
- Integrated external systems such as **Stripe, PayPal, Vimeo, and Zoom APIs**.

- Containerized applications using **Docker** and deployed cloud infrastructure on **AWS (EC2, S3, RDS)**.
- Developed **CI/CD pipelines** using **GitHub Actions and Jenkins** to automate builds, testing, and deployments.
- Wrote **unit and integration tests** using **Jest and Mocha**, improving code quality and system reliability.
- Participated in **code reviews and technical mentoring** for junior developers while collaborating in **Agile/Scrum teams**.

Software Engineer | DevOps | Future Processing | 06/2020 – 09/2024

- Designed and implemented CI/CD pipelines using **GitHub Actions** for Node.js applications, enabling automated build, test, and deployment processes.
- Configured pipeline stages for **linting, unit testing, security scanning, and deployment**.
- Reduced deployment time by **70%** by replacing manual deployment with automated pipelines.
- Containerized Node.js REST APIs and microservices using **Docker** for consistent development and production environments.
- Deployed Node.js full-stack applications on **AWS EC2 instances** with automated startup scripts.
- Configured **AWS S3** for static file storage and media hosting.
- Integrated **AWS RDS (PostgreSQL/MySQL)** for scalable database management.
- Set up **auto-scaling groups** to dynamically scale applications based on traffic load.
- Implemented Infrastructure as Code using **Terraform** to automate AWS resource provisioning.
- Implemented application monitoring using **Prometheus** for Node.js service metrics.
- Managed Node.js production processes using **PM2** with clustering mode for improved performance.
- Implemented environment variable management using **.env configuration and secure secret storage**.

Software Engineer | Tech Lead | adesso SE | 04/2016 – 05/2020

- Led a team of **6 full-stack developers** building scalable web applications using **Node.js, Express.js, React, and PostgreSQL**.
- Architected **microservices-based backend systems** with RESTful APIs and event-driven architecture.
- Implemented **CI/CD pipelines** using tools like **GitHub Actions / Jenkins / Docker**, reducing deployment time by **40%**.
- Designed and optimized **database schemas** and queries for **PostgreSQL / MongoDB**, improving performance and scalability.
- Conducted **code reviews, technical mentoring, and sprint planning** in Agile/Scrum environments.
- Integrated third-party services such as **payment gateways, authentication systems, and cloud services (AWS)**.
- Implemented **secure authentication & authorization** using **JWT / OAuth**.
- Improved API response times by **30%** through caching strategies (**Redis**) and performance optimization.
- Collaborated with product managers and designers to translate business requirements into technical solutions.
- Oversaw **production deployments, monitoring, and troubleshooting** using tools like **Docker, Kubernetes, and logging systems**.

Software Engineer | STX Next | 07/2013 – 02/2016

- Delivered custom applications using **Node.js, PHP and Java**.
- Built frontends in **React, Angular and Vue**, focusing on accessibility and UX.

- Designed and optimized **SQL databases (PostgreSQL, MySQL)** for business-critical workflows.
- Implemented **GraphQL and REST APIs** for cross-platform integrations.
- Created **real-time dashboards** using WebSockets and event-driven data.
- Automated deployments with **Docker and Ansible**.
- Improved performance by migrating legacy apps to **modern frameworks**.
- Worked with Python (Django / FastAPI) for data-heavy backend systems.
- Integrated third-party APIs for **payments, analytics and reporting**.
- Set up **continuous integration pipelines** for automated testing and delivery.
- Applied **unit, integration and end-to-end testing** with Jest and Cypress.
- Collaborated in **Agile sprints** with cross-functional teams.
- Trained junior developers on best practices for **Node.js, React and PHP**.
- Enforced security measures against **XSS, CSRF and SQL injection**.
- Produced **project documentation, ER diagrams and code standards**.
