

Luka Pavlovic

Belgrade , Serbia

pavloicluka061@gmail.com

Profile	- Frontend Platform Engineer with 10+ years of experience designing and building scalable, high-performance frontend platforms and complex SaaS applications. Specialized in TypeScript, React, Next.js, Vue.js, frontend architecture, performance optimization, and developer experience improvements. - Experienced in building architecture-heavy frontend systems, reusable platform primitives, component libraries, real-time applications, data visualization tools, and complex interactive user interfaces. Strong background in canvas-based interfaces, WebSocket communication, frontend performance profiling, scalable UI architecture, and collaboration with distributed engineering teams. - Proven ability to lead frontend modernization initiatives, define engineering standards, mentor developers, and deliver production-grade applications with strong focus on maintainability, scalability, and user experience.
Skills & Abilities	Frontend Engineering & Architecture TypeScript, JavaScript (ES6+), React, Next.js, Vue.js, Vue 3, Component Architecture, Frontend Platform Engineering, Design Systems, Reusable UI Components, Atomic Design, State Management, Redux, React Query, Vue Composition API, Frontend Developer Experience (DX), Architecture Patterns Advanced UI Engineering Canvas-Based Applications, Interactive Editors, Complex UI Systems, Data Visualization, D3.js, Cytoscape.js, Real-Time Interfaces, WebSocket Applications, Performance Optimization, Rendering Optimization, Browser Performance Profiling, Core Web Vitals, Responsive Design, Accessibility Real-Time & Collaboration Systems WebSockets, Real-Time Communication, Event-Driven UI Updates, Collaborative Application Patterns, Collaborative Editing Systems, CRDT Concepts, Multiplayer Application Architecture, Workflow Automation Platforms, API Integration, Distributed Frontend Systems Backend & Platform Integration Node.js, NestJS, Express.js, REST APIs, GraphQL, Microservices Architecture, API Design, Backend Integration DevOps & Cloud Docker, Kubernetes, AWS, Azure DevOps, CI/CD Automation, Git Workflows, Cloud Deployments

	Leadership & Engineering Practices Technical leadership & team mentoring ,Code reviews & architecture ownership ,Agile/Scrum methodologies ,System design & scalability planning ,Cross-team collaboration
Experience	Frontend Tech Lead / Senior Full Stack Engineer May 2023 – February 2026 TechNova • Led frontend architecture and platform development for enterprise-scale SaaS applications using TypeScript, React, Next.js, and modern frontend tooling. • Designed scalable frontend foundations including reusable component systems, UI primitives, and shared engineering patterns. • Built complex interactive dashboards and data-driven applications using React, Next.js, D3.js, and Cytoscape.js. • Developed high-performance interfaces handling complex workflows, large datasets, and dynamic user interactions. • Improved rendering performance through component optimization, state management improvements, and frontend profiling. • Designed frontend architecture supporting maintainability, scalability, and faster feature delivery across engineering teams. • Implemented real-time application features using WebSocket communication patterns. • Collaborated with backend teams to define API contracts and improve frontend-backend system integration. • Established frontend engineering standards around code quality, testing, architecture, and developer experience. • Built automated testing strategies using Jest and Playwright for critical user workflows. • Led frontend CI/CD workflows using Azure DevOps and Kubernetes-based deployments. • Mentored engineers through code reviews, architecture discussions, and technical guidance. • Designed interactive workflow-style user interfaces with reusable frontend primitives and scalable component architecture. • Built extensible frontend modules supporting plugin-based features and dynamic user interactions. • Designed collaborative frontend experiences supporting real-time user interactions and synchronized application state. • Worked with workflow-oriented interfaces and dynamic node-based UI patterns for complex business processes. • Optimized complex rendering workflows for large-scale interactive applications. Senior FrontEnd Engineer June 2020- May 2023 GlobalSoft Systems

	• Developed scalable frontend platforms using TypeScript, React, Next.js, and modern JavaScript frameworks. • Built SaaS applications with complex user workflows and enterprise-level requirements. • Designed reusable frontend modules and improved application maintainability through component-driven architecture. • Worked on frontend platform improvements, shared libraries, and engineering standards. • Implemented performance optimizations improving rendering speed and application responsiveness. • Developed interactive user interfaces integrating APIs, GraphQL services, and real-time data flows. • Built automated testing solutions using Jest and Playwright. • Collaborated with international engineering teams on architecture decisions and product improvements. FrontEnd Engineer May 2017– June 2020 DigitalCore Technologies • Developed frontend applications using React, Vue, and Angular. • Built dashboards and reporting systems with data visualization components. • Designed reusable UI components and improved frontend consistency. • Integrated APIs and optimized frontend performance for high-traffic systems. • Developed Vue.js applications and reusable frontend modules for enterprise SaaS platforms. • Worked on frontend reliability improvements including caching and retry strategies. FrontEndEngineer November 2015 – May 2017 CodeBridge • Developed frontend interfaces using React, Next.js, and JavaScript. • Built reusable UI components and implemented responsive web applications. • Integrated frontend applications with REST APIs and backend services. • Improved frontend performance and user experience through optimization practices. • Participated in testing automation and CI/CD improvements.
Education	University of Belgrade – Serbia – Master of Science in Computer Science October 2011 - September 2016 Bachelor : 2009-2013 Master : 2013-2015
